Designing For The Best Experience For All Users

Web pages can be viewed using many different devices: desktops, tablets, and phones. Your web page should look good, and be easy to use, regardless of the device.

Web pages should not leave out information to fit smaller devices, but rather adapt its content to fit any device:

- Use **Flexbox** for layout.

- **Desktop:** Sidebar and content side by side.

- **Tablet (≤768px):** Sidebar above content.

- **Phone (≤480px):** Everything in one column.
